California Dahlia Seed

AVE you ever tried growing any of our California dahlia seed?

If not, you are missing one of the greatest pleasures imaginable.

We select our seed with great care from the newer dahlias only, and our long, rainless summers make it possible to collect seed from the large double varieties. We have received hundreds of

testimonials from our customers telling of the wonderful success they have had with our seed—many having won First Prizes with their seedlings.

75 Selected Seeds—From a general collection of dahlias.....\$1.00

75 Extra Selected Seeds—The outside seeds of large varieties.....\$2.50

75 Extra Choice Seeds—The outside seeds from the newest prize-winning novelties only. No better seeds can be obtained at any price \$5.00

Dahlia seeds should be sown about March 15th, preferably in boxes or flats, filled with sandy leaf mold soil. Plant the seed about three-quarters of an inch deep, not too closely—2 or 3 inches apart—and keep in a warm, sunny place. Under no conditions let the soil dry out. Transplant in the open when the weather is free from frost, planting about fifteen to eighteen inches apart. With a little care you will have large bushes and abundant bloom in about ninety days. New varieties are produced in this manner. Discard any undesirable ones, as they bloom.

Should any of our seeds produce exceptional flowers, send us a tuber the following spring, and we will grow it, giving it the best care possible. If it proves to be a marketable variety, we will pay you five dollars for the tuber, and name it for you, or as you desire. Each tuber sent should be plainly labeled with name and address of the sender, and accompanied by a description of the flower.

SAMUEL NEWSOM

Again we wish to thank you, our friends and customers, for your continued patronage and many kind letters telling us of the success you have had in growing our California dahlias. Due to your loyalty and friendship, the season just passed has been most gratifying and successful. We have endeavored at all times to introduce nothing but the best and choicest of the California dahlias. The great beauty and decorative value of the newer varieties is rapidly being recognized by the florists as well as all flower lovers throughout the entire country. Our large sized California flowers, with their magnificent coloring are due to the variety, and not the climate, and will be a success wherever dahlias can be grown.

At the recent 1923 Annual Dahlia Exhibition of The Dahlia Society of California, given at the Palace Hotel, we won by far the greatest number of prizes, being awarded twenty-five in all, including eleven First Prizes. The award which gave us the greatest pleasure was the First Prize for the Most Artistic Exhibit. The outstanding feature of our display was the vase of fifty blooms of "Amun Ra" which also won First Prize. Our baskets of Pompon and Decorative dahlias of California origin, which were awarded First Prizes, were among the most beautiful features of the entire exhibition.

You are cordially invited to visit our display garden during the blooming season. Take any of the Peninsula busses, or street cars going to San Mateo or the Cemeteries, and stop at Sickles Avenue (the end of the five-cent fare), where you will see our garden to the left.

Our office will remain at 607 Third Avenue, where all orders and communications should be addressed.

JESSIE L. SEAL,
607 Third Avenue, San Francisco, California.

Full directions for planting and growing fine Dahlias are enclosed with each order. They include valuable hints for preparing for the flowers for decorations and exhibitions, also explaining the necessary qualifications of flowers for competition, whether they should have open or closed centers, and many other puzzling points connected with exhibiting.

Order Early—Directing us when to send them. Early orders are solicited to prevent disappointment in case our stock of those selected has been depleted. If you do not find the varieties you want in this selection, write us. We have many of which stock is too limited to catalogue.

Terms—Remittance with order. All retail orders are delivered prepaid.

We Guarantee all tubers true to name, and also their arrival in good growing condition. We cheerfully replace any that should prove otherwise. Kindly notify us at once. Orders are carefully filled from selected field grown divided tubers. We do not substitute unless requested.

Although every precaution is taken in packing, we do not guarantee tubers against freezing if sent before March fifteenth.

Decorative Dahlias

Decorative Dahlias are large and usually full to the center, with loosely formed long, flat petals. Many new introductions are remarkably beautiful. Some of the best cut-flower varieties are in this class.

- †**Aibonita**—One of our largest Dahlias. A lovely flower of a bright, glowing violet pink shading to a rich golden yellow at the center. The formation is unusual owing to the great depth of the petals and fullness of the flower. The stems are long and graceful, carrying the flowers like pink Chinese lanterns, giving a bright effect to the whole garden. **\$2.50.**
- †**Alaska**—A large cream white decorative with long good stems. **75c.**
- †**Amun Ra**—A Gold Medal Dahlia, and our greatest prize winner. This Dahlia was again a sensation at the 1923 annual Exhibition of The Dahlia Society of California at the Palace Hotel, winning a First Prize for the fourth consecutive year! This immense decorative, resembling a glorious setting sun, is a mystery in color and unlike any color combination known in a Dahlia. The outer petals of the mammoth blooms are of gorgeous shades of copper and orange, shading to gold and amber, and deepening in the large, full center to a rich, dark, reddish bronze. This new metallic coloring appeals to all. The stems are wonderful—erect and stout—and hold the immense blossoms well above a strong, vigorous plant. The blossoms keep for days when cut and last indefinitely on the bush. We have received innumerable letters from our customers throughout the entire country, telling of the success and prizes won with this magnificently colored Dahlia. Many consider it the finest ever introduced. As we have an abundant stock, we are enabled to reduce the price to within the reach of all. **\$3.50** per tuber.
(See illustration on Page 3)
- †**Anna Maier**—A large decorative of peculiar coloring. A pinkish red, like old velvet, varying to soft yellowish red towards the center, long wiry stems carrying the flower well above the foliage. **\$1.50.**
- †**Al Koran**—This novelty is one of the best of J. W. Davies' introductions. Yellow, suffused with goldenrod and amber. This large flower, held on long, strong, stiff stems, above a tall growing bush, is extremely attractive in the garden. **\$5.00.**
- †**Arrow of Gold**—This most beautiful novelty is a refined blossom of pure gold, deepening in the center and shading to a golden apricot and amber at the outer petals. The immense deep blooms are held erect on long stiff stems, making it a wonderful variety for cutting and exhibiting. We were so pleased with this Dahlia that we secured the entire stock from its originator, Mrs. J. Streeter. We introduced this Dahlia last year, and have received such excellent reports that we feel confident in recommending it most highly. **\$5.00.**
(See illustration on Page 4)

We are the distributors of the Sies Dahlia Manual, which covers all points for the successful raising of Dahlias to perfection. This is a most thorough, comprehensive, and practical study of the Dahlia and worth many times the amount asked. 60c.

Do not be discouraged if a Dahlia from a different locality does not do well the first season it is planted. Try it again the second year, as many varieties need to be acclimated.

How to Keep Cut Blooms of Dahlias

Cut the flowers in the evening if possible, and before the pollen has too well developed. Burn the ends of the stems on a gas flame; or, better still, for exhibition purposes, dip ends of stems in boiling water for about 12 seconds and immediately plunge in fresh cold water. Place in cool place or out of doors for the night.

Should Dahlias be picked in the day time, put the stems in a pitcher containing three inches of boiling water and leave there 15 minutes. Then remove to a deep vase of fresh, cold water. The less foliage the better. Wilted flowers may often be revived in the same manner.

A partial view of our recent exhibit, which won First Prize for the "Most Artistic Exhibit" awarded by the Dahlia Society of California, at the Palace Hotel. Our prize-winning vase of fifty "Amin Ra" can be seen in the window. The sunlight, shining through the golden amber curtains enhanced the beauty of these magnificent blossoms.
